Who We Are

INFARAZA BUSINESS SOLUTIONS (IBS) is a Saudi-based multidisciplinary provider of high-value technical, operational, and management services across the Telecom, Power, IT, Contracting, Facility Management, Hospitality, Catering, and Hajj Operation sectors.

Guided by **innovation, integrity, and operational excellence**, **INFARAZA** delivers fully integrated, end-to-end services—from infrastructure deployment and digital transformation to hospitality management and large-scale event operations—ensuring safety, efficiency, and on-time delivery throughout the Kingdom of Saudi Arabia.

With a leadership team bringing over **15 years** of experience in major infrastructure, telecom, and service-industry projects across multiple regions of the Kingdom, **INFARAZA** actively supports Saudi Vision 2030 by providing smart, scalable, and sustainable solutions tailored to the evolving needs of its clients.

OUR VISION

To be a trusted national leader in integrated business, technical, and hospitality solutions, delivering sustainable value through innovation, technology, and service excellence.

OUR MISSION

To provide reliable, premium, and customer-centric services that empower organizations to achieve operational excellence and long-term growth through skilled professionals, smart systems, and advanced technologies.

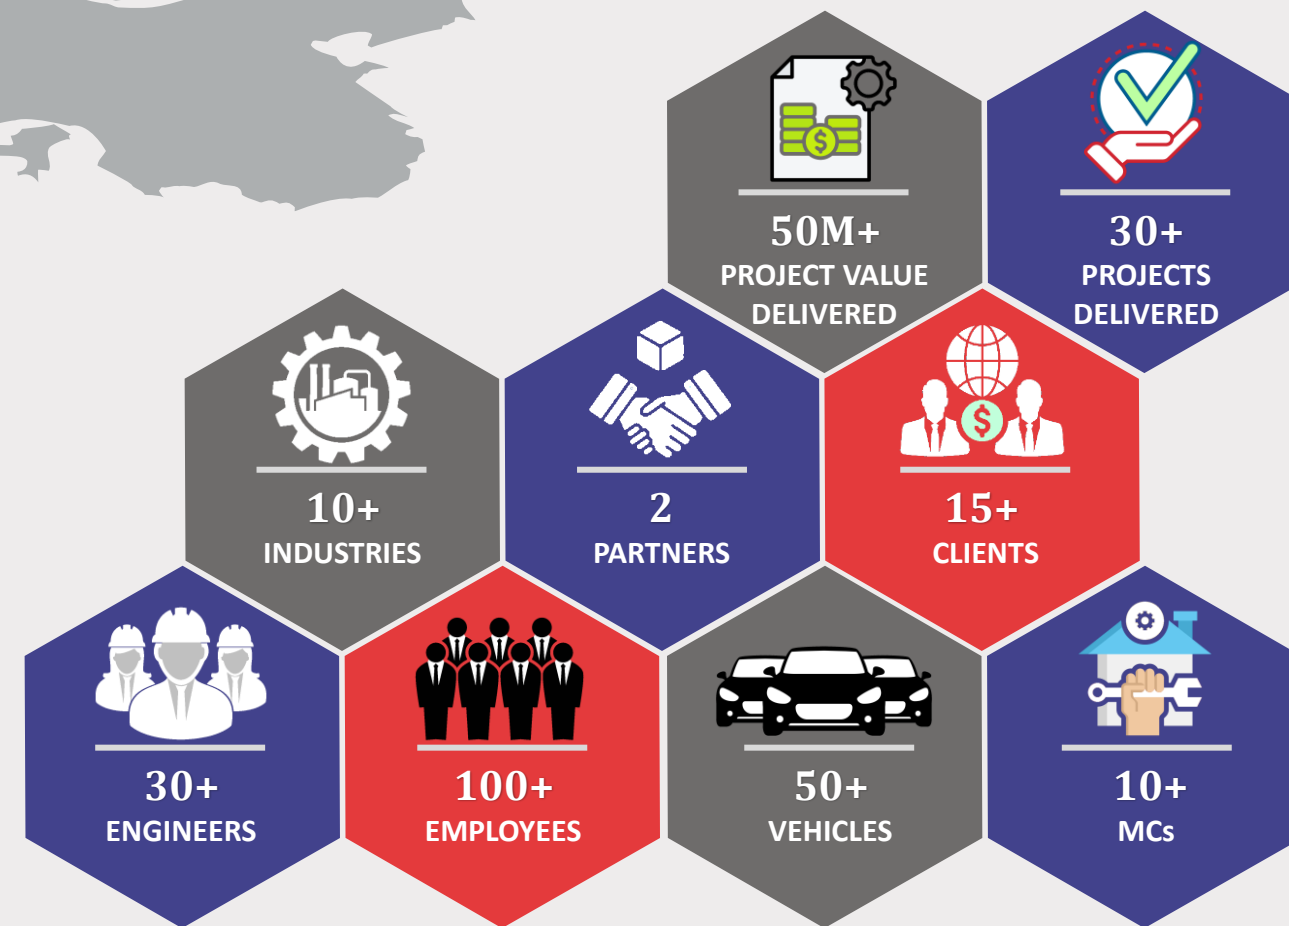

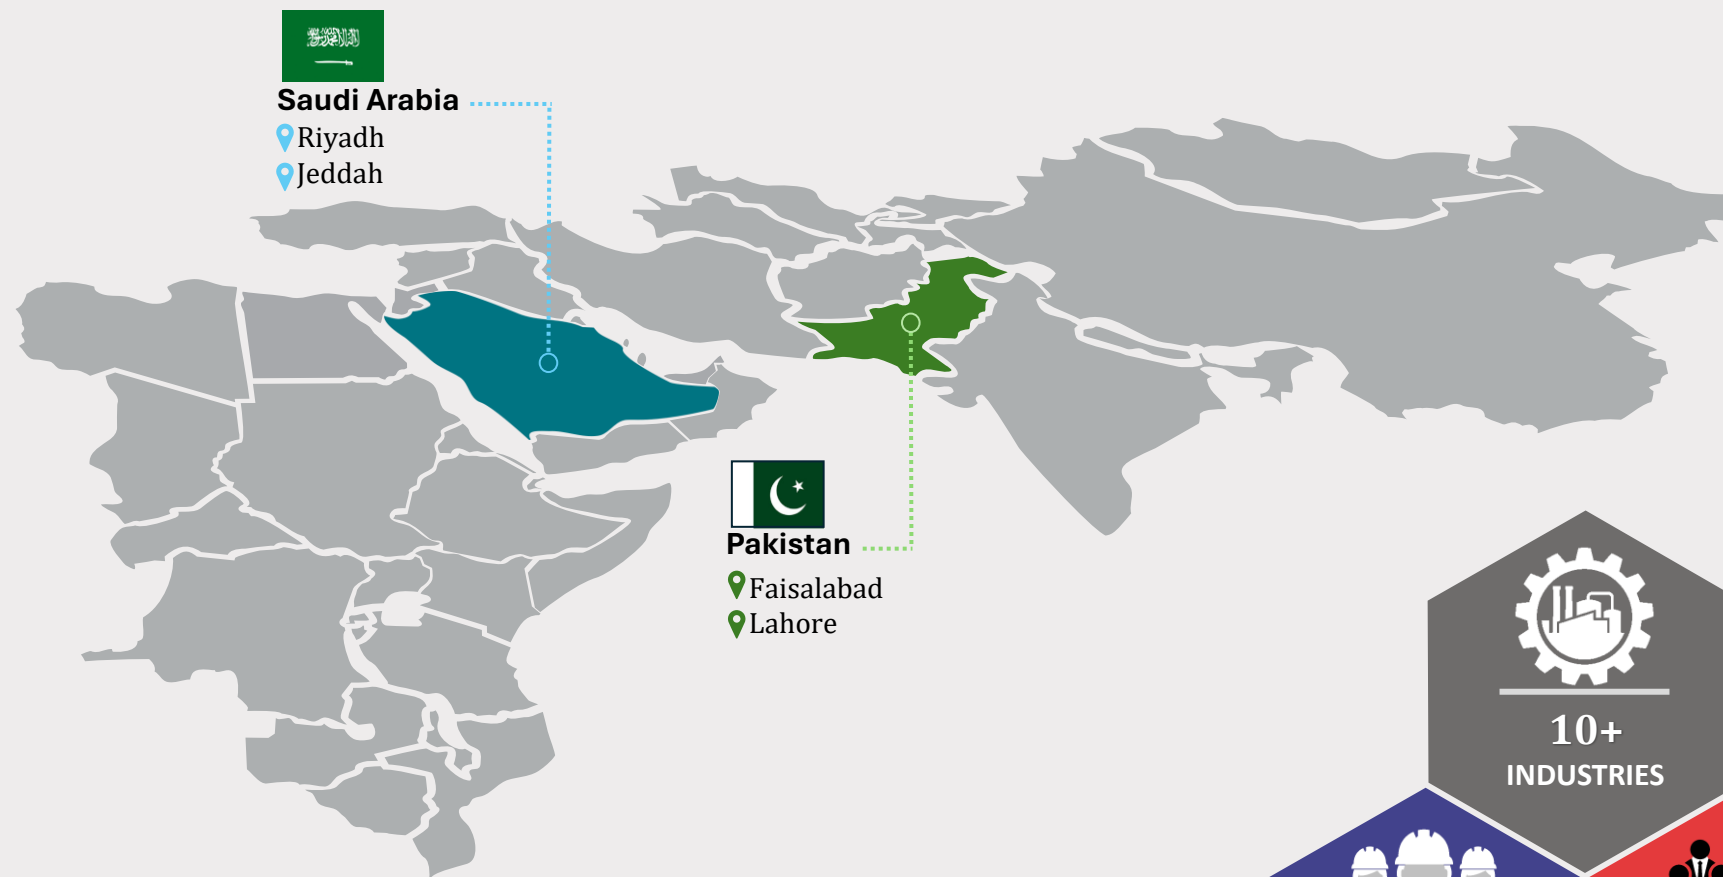

Our Footprint

INFARAZA is a global operations technology solution provider with a rich history of delivering projects in key energy-producing regions around the world. We excel in delivering best-fit solutions with localized services for end-to-end project lifecycle coverage.

We leverage multi-disciplinary expertise fostered by assiduous in-house R&D and strategic partnerships with technology leaders to guarantee successful project execution.

SERVICES

Telecom

INFARAZA delivers **comprehensive telecom infrastructure solutions** that empower fast, reliable, and future-ready networks across the Kingdom.

Its expertise spans **Fiber OSP/ISP Deployment**, providing end-to-end fiber network construction and integration, as well as **FTTH, FTTM, and FTTB implementations** that extend high-speed broadband connectivity to homes, towers, and enterprises.

The company also excels in **Telecom Power and Civil Works**, ensuring complete power and structural readiness for telecom sites. Through strong **Project Management** and **Field Operations**, **INFARAZA** oversees planning, supervision, and seamless execution of rollout activities. To guarantee performance and reliability, its **Network Testing and Commissioning** services deliver professional measurement, validation, and quality assurance.

OUR SERVICES INCLUDE.

01 Fiber OSP/ISP Deployment

Turnkey deployment of backbone and last-mile fiber networks, including FTTH, FTTM, and FTTB, from route survey to splicing and integration.

02 Site Survey and Engineering

Comprehensive site surveys and engineering assessments to ensure optimal network design, placement, and performance.

03 Delivery and Installation

End-to-end delivery and expert installation of telecom systems customized to meet specific operational requirements.

04 System Commissioning & Integration

Professional commissioning and integration of network components to ensure reliable system performance.

05 Telecom Power & Civil Works

Complete power and civil infrastructure for telecom sites, covering foundations, shelters, cabling, and reliable AC/DC and backup systems.

06 Maintenance – FLM

Proactive and responsive maintenance solutions to detect, diagnose, and resolve network issues, ensuring continuous uptime and reliability.

SERVICES

Microwave

INFARAZA specializes in delivering services related to **advanced microwave communication systems** across Saudi Arabia, providing **high-speed** and **highly reliable wireless connectivity** for businesses, government entities, and telecommunications providers. Our **microwave link solutions** are engineered to meet the increasing demand for **robust data transmission**, particularly in **remote locations** and **challenging terrains**. Whether you require **point-to-point connectivity** or a wider **network infrastructure**, we offer **tailored, long-range microwave systems** designed to support your specific communication requirements with exceptional performance and dependability.

OUR SERVICES INCLUDE.

01

MICROWAVE LINK INSTALLATIONS

Professional installation of high-performance microwave links that ensure stable, long-distance wireless communication. Our team delivers reliable setups built for consistent network performance.

02

LINE OF SIGHT SURVEY, PATHLOSS AND SITE ENGINEERING

Comprehensive LOS surveys and Pathloss analysis to optimize link quality. We engineer each site to achieve maximum signal strength and minimal interference.

03

DELIVERY AND INSTALLATIONS

Efficient delivery and precise installation of all microwave system components. Every deployment follows strict quality standards for smooth network integration.

04

MAINTENANCE - FLM

Ongoing maintenance and First-Line Maintenance (FLM) services to keep your systems running reliably. We provide fast fault detection and resolution to minimize downtime.

SERVICES

FOC (Fiber Optic Cable)

We deliver cutting-edge fiber optic cable (FOC) solutions, providing reliable and efficient connectivity to meet the rising demand for high-speed, high-capacity data transmission. Whether you require traditional buried FOC systems, micro-duct and blown fiber solutions, or FTTx deployments, our team ensures your network is built with future-ready technology and industry-leading expertise.

With a strong focus on customized indoor and outdoor fiber network solutions, we provide end-to-end support—from design and installation to ongoing maintenance. Our commitment is to deliver exceptional service, precise implementation, and long-term reliability to keep your communication infrastructure performing at its best.

OUR SERVICES INCLUDE.

01

Long-Haul Fiber Optic Cable Deployment

End-to-end design, supply, and installation of long-distance FOC routes across highways, inter-city corridors, and remote regions. We ensure high-capacity, low-loss connectivity suitable for national backbone networks.

02

Metro & In-City Fiber Network Installation

Design, supply, installation, splicing, and testing of micro-duct and blown fiber systems, including urban fiber deployment with buried ducts, manholes, and access points for seamless integration with city infrastructure.

03

FTTx & FTTH Services

Comprehensive FTTx & FTTH solutions for residential, commercial, and enterprise connectivity. We handle planning, installation, splicing, testing, and activation to deliver high-speed broadband access.

04

Maintenance & FLM Support

Proactive maintenance and First-Line Maintenance (FLM) services for fault detection, localization, and rapid restoration. We help maintain uninterrupted network performance across all fiber routes.

SERVICES

Civil Works

We deliver high-quality civil works across Saudi Arabia, supporting the safe and efficient execution of essential infrastructure projects. Our services cover surveys, GIS design, trenching, duct laying, manhole installation, rodding & roping, as well as smart pole and tower design, erection, and commissioning along with drilling, coring, firestop applications, and room integrity testing to ensure full project reliability.

OUR SERVICES INCLUDE.

01

Low- and High-Level Surveys & GIS Design

Comprehensive field surveys and GIS-based designs that ensure accurate planning, mapping, and documentation. We deliver precise layouts that support efficient and compliant infrastructure development.

02

Trenching, Excavation & Duct Infrastructure

Complete civil works including trenching, excavation, duct laying, and manhole installation. We provide safe, compliant, and high-quality underground infrastructure for fiber and utility networks.

03

Smart Poles & Mobile Tower Solutions

Professional design, erection, and commissioning of smart poles and mobile towers tailored for modern communication networks. Our solutions support enhanced coverage, IoT integration, and future-ready smart-city applications.

04

Wall Penetration, Coring & Horizontal Drilling

Specialized wall penetration, core drilling, and horizontal drilling services for precise cable routing and equipment installation. We ensure minimal disruption and high accuracy across all structural environments.

05

Firestop Sealant Application & Integrity Testing

Certified firestop sealant installation and room integrity testing to ensure compliance with safety standards. Our solutions enhance fire protection, containment, and overall facility safety.

SERVICES

MEP Works

We deliver high-quality MEP works across Saudia, supporting the safe & efficient execution of essential infrastructure projects. Our services cover surveys, GIS design, trenching, duct laying, manhole installation, rodding & roping, as well as smart pole and tower design, erection, and commissioning along with drilling, coring, firestop applications, and room integrity testing to ensure full project reliability.

OUR SERVICES INCLUDE.

HV & LV Cabling and Power Supply Installations

Professional installation of high- and low-voltage cabling and power supply systems, ensuring safe, reliable, and efficient electrical distribution across all project environments.

Cable Tray, GI Pipe, Metal Trunk & Duct Installation

Expert installation of cable trays, GI pipes, metal trunks, and duct systems designed to support organized, secure, and efficient cable management for complex infrastructure networks.

UPS & Rectifier Supply, Installation and Commissioning

Comprehensive supply, installation, and commissioning of UPS units and rectifiers, delivering stable and uninterrupted power solutions to maintain critical system performance.

SERVICES

Energy & Power

We deliver comprehensive solar energy solutions across Saudi Arabia, supporting Vision-driven infrastructure and sustainable development initiatives. Our expertise spans design, engineering, procurement, installation, testing, and commissioning of utility-scale and commercial solar power systems. With strict adherence to SEC standards and international safety codes, we ensure reliable, efficient, and future-ready energy solutions tailored to project requirements.

OUR SERVICES INCLUDE.

Solar Assessment & Engineering

We conduct feasibility studies, load analysis, site surveys, shading checks, and system optimization. Our engineering team delivers compliant DC/AC designs, cable sizing, protection schemes, and seamless integration with existing power systems.

Procurement & System Installation

We supply and install high-quality solar panels, inverters, mounting structures, combiner boxes, transformers, and protection equipment. Our certified team ensures precise installation with strict safety and quality standards.

Testing, Commissioning & Grid Integration

We perform full system testing, performance verification, energization, and grid synchronization. Our team manages SEC coordination, documentation, inspections, and approvals to ensure smooth operational readiness.

Operations & Preventive Maintenance

We provide routine inspections, thermal scanning, panel cleaning, inverter diagnostics, monitoring, troubleshooting, and performance optimization. Long-term maintenance contracts help maximize energy output and extend system lifespan.

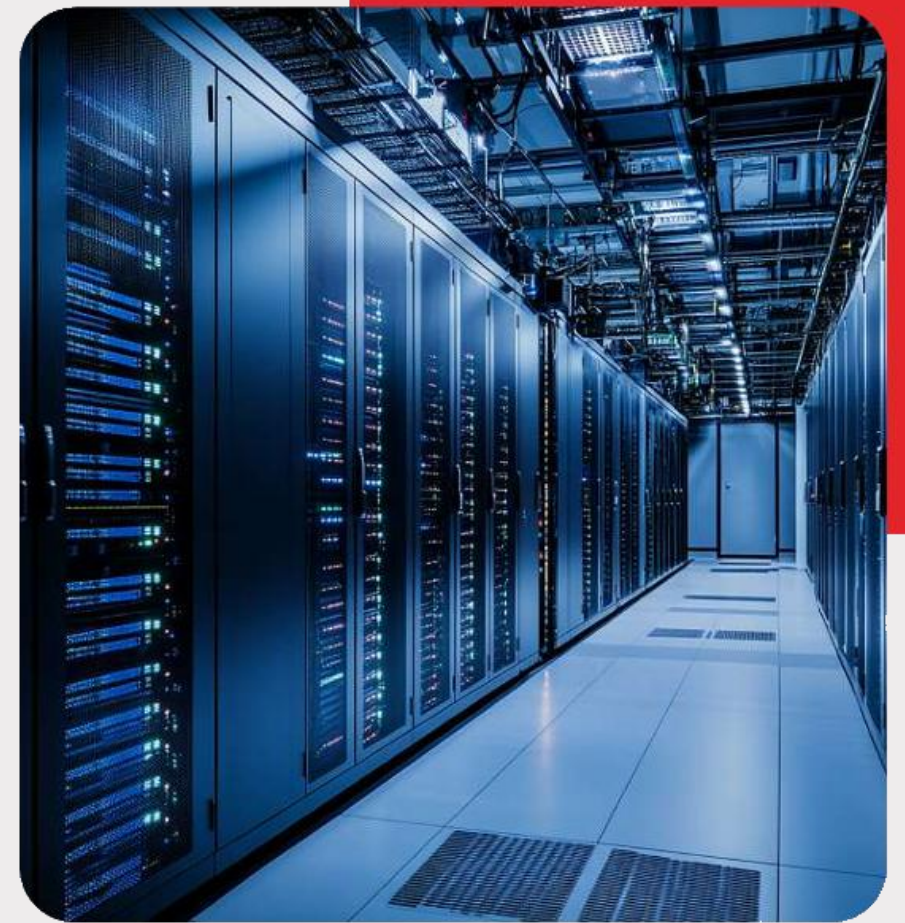

SERVICES

Low Voltage Systems

We specialize in the design, supply, and installation of low voltage systems, including PABX, structured cabling, SMATV, BMS, data centers, and CCTV solutions. Our expert team ensures each system is tailored to meet your unique business needs, optimizing functionality and performance while providing ongoing maintenance services to ensure long-term reliability and efficiency.

OUR SERVICES INCLUDE.

PABX Systems

Design, supply, and installation of analogue, hybrid, and IP-based communication systems.

Structured Cabling

End-to-end design and deployment of structured cabling for reliable network performance.

SMATV Solutions

Installation and integration of Satellite Master Antenna Television systems.

Building Management Systems (BMS)

Smart BMS design and implementation for centralized monitoring and control.

Data Centers & Network Switching

Customized data center setups and advanced network switch solutions.

CCTV & Security Systems

High-performance CCTV design and installation for enhanced security.

Maintenance Services

Comprehensive maintenance to ensure optimal system reliability and uptime.

SERVICES

Asset Management

We deliver a comprehensive asset management framework encompassing asset identification, tracking, monitoring, valuation, and lifecycle optimization. Our approach integrates advanced IT solutions and fully in-house, custom-built digital platforms that provide real-time visibility, intelligent analytics, and seamless operational control.

By combining technical expertise with tailored digital innovation, we enable organizations to manage equipment, machinery, and infrastructure with greater accuracy, efficiency, and reliability. Our commitment is to maximize asset value, extend lifecycle performance, and support sustainable operational growth.

OUR SERVICES INCLUDE.

01

Asset Identification & Inventory Control

Precise classification and digital cataloging of all assets to ensure full operational visibility.

02

Asset Tracking & Real-Time Monitoring

Continuous monitoring of asset location, usage, and condition through integrated smart systems.

03

Asset Valuation & Financial Assessment

Accurate, data-driven valuation to support budgeting, compliance, and strategic decision-making.

04

Lifecycle Management & Optimization

End-to-end lifecycle planning to maximize performance, extend lifespan, and reduce operational costs.

05

IT-Enabled Asset Intelligence

Advanced analytics, IoT integration, and automated reporting powered by in-house, fully customized digital solutions.

06

Digital Platform Development & Custom Solutions

Tailor-made asset management platforms designed internally to deliver seamless control, workflow automation, and enterprise-wide efficiency.

Transformative Tech Solutions

SERVICES

SKYAROOS (INFARAZA's partner) specializes in software development, finance and banking solution integrations, project delivery, and IT infrastructure support across the banking, financial, and public sectors.

Beyond delivering highly efficient and cost-effective IT solutions, we also provide tailored, industry-specific services designed to meet the unique needs of virtually any sector.

We Offer Cutting-Edge Technologies:

Cloud

Leverage our cloud expertise for seamless migrations, scalable infrastructure, and optimized hybrid environments.

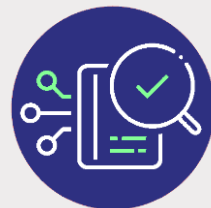

Intelligent Solutions

Build custom AI/ML web and mobile solutions tailored to automate workflows and enhance decision-making.

Cybersecurity

Deploy robust security architectures with continuous monitoring, threat intelligence, and compliance assurance.

Data Analytics

Harness big data analytics, interactive dashboards, and AI insights for strategic business decisions.

Key Features

We enable our clients to work closely with our team, sharing valuable insights into their specific requirements as we go further to deliver innovative digital solutions.

Web Development

Scalable, responsive web applications built with cutting-edge frameworks like React and Node.js for seamless, high-performance user experiences across all devices.

Mobile Development

Native and cross-platform mobile apps developed with Flutter and Swift, optimized for speed, security, and superior user engagement on iOS and Android platforms.

Custom Software

Bespoke software solutions custom-engineered to meet complex business requirements, streamline workflows, and deliver measurable ROI through tailored functionality.

Automation Scripts

Intelligent scripting solutions using Python and JavaScript to automate repetitive processes, eliminate manual tasks, and significantly boost operational efficiency.
